

Two great iOS apps updates: Box.net and Flipboard

As reported by our friends at theifile.com two of the *essential* apps all iOS users must have just released their latest (and still best) updates ever!

[Flipboard](#): one of my favorite social media aggregator, now available for iPhone too (and with a single Flipboard account you can have the same content cloud-style on all your iOS devices).

[Box.net](#): now updated with (at last!) photos and videos upload (as well as all other files - PDFs included aimed at iBooks collections).

Oh, did I mention they're both free?
