

Technology Review - March/April 2012 issue: interview with Drew Houston - Dropbox founder - on cloud storage

The latest issue of [Technology Review](#) features an interview with [Dropbox](#)'s founder Drew Houston about cloud storage and the future.

I love **Technology Review** and I'm definitely addicted to **Dropbox** so I'm writing this to spread the (good) news about both.

This is how Drew talks about his Dropbox's founding tale:

The breaking point for me was a bus ride. I went down to Boston's South Station to ride the Chinatown bus to New York. I was thrilled to open my laptop and have four hours where I could finally get some work done. But I had that sinking feeling that something was wrong, and I started feeling in my back pocket for my thumb drive, and of course I could just see it sitting on my desk at home. So I sulked for about 10 or 15 minutes and then opened up the [text] editor and wrote some code that I thought would solve the problem. And I met up with Arash through a mutual friend at MIT, and he decided to drop out with a semester left, and we went to California and got to work.

If you don't know **Technology Review**...

Technology Review is an independent media company owned by the Massachusetts Institute of Technology (MIT). More than two million people around the globe read our publications, in five languages and on a variety of digital and print platforms. We publish Technology Review magazine, the world's oldest technology magazine (established 1899); daily news, analysis, opinion, and video; and Business Impact, which explains how new technologies are transforming companies, disrupting markets, or creating entirely new industries. We also produce live events.

If you don't know **Dropbox**, go and get some 2 Gigabytes online cloud storage for free, as well as cross-platform client, iPad support and a lot more - and ditch those USB flash drives...
