

Remembering Steve: one year later Apple's tribute

One year later...

This is the message from Tim Cook on Apple's home page.

How much has gone through in this year, not only in Apple's history?

Check Apple's web site for the memorial video with some awesome (black and white, of course) photos of Steve, some great smiles and some superb Apple toys in the background. I love the photos in which Steve is typing on an Assembler monitor on Apple I motherboard.
