

✖ As we're reaching the end of 2012, we're getting more and more "*Year-stats*": social analysis tool **Beevolve** brings us a complete survey of more than 35 million Twitter accounts and some results are quite amazing.

US Twitter users are 50/50 percent Female/Male whereas in France there's a male majority. (all data are based on self-disclosed profiles)

The biggest slice belongs to the 10-20 years old age range and, yes, women tweet more than men!

Regarding the Twitter weapon of choice, **iOS app accounts for more than 68%** (compared to the Android app), while **32% of users still tweet from their web browsers.**
