

Today's Google Doodle celebrates Roswell 66th anniversary (with a tiny HTML5 game)

Whatever happened in [1947 in Roswell, New Mexico](#), (an alien crash landing or any other controversial event) today, the latest [Google Doodle](#) celebrates the 60th anniversary with a very nice HTML5 game.

Think of it as tiny *adventure-game*, just like [Monkey Island](#), where you're supposed to solve puzzles, collect (useful) objects and interact with the environment - only on a very small scale.

Just use your mouse and a little imagination.

This is what you get at the end of the game, provided you've been able to solve the (very simple albeit) puzzle...

From a programmer's point of view it's an HTML5 masterpiece: well done Google, as with all Doodles!
