

Pure genius: The Simpsons rendered using *only* CSS!

This is really awesome!

Do you know **CSS**?

Do you think you can master CSS enough to build whatever web-page layout you want or any special effect?

Before answering, consider taking a look at [Chris Pattle's Simpsons in CSS](#).

Full characters made just of CSS code, best viewed in Chrome (Firefox seems to work fine, though) and full [source code, thanks to GitHub](#).

Awesome: great job Chris!
