

Windows 95 Video Guide with Jennifer Aniston and Matthew Perry:
PCs explained by “Friends” actors

Back in 1995!

The world was raving for [Friends sitcom](#) and **Windows 95** has just been released.

Someone thought it was a good idea to put Hollywood stars **Jennifer Aniston** and **Matthew Perry** in this video acting like themselves trying to meet Bill Gates in his office. They miss Bill but get her assistant and meet Windows 95 world - and learn (and supposedly teach us) how to use 'modern' computers along.

Well, it looks like it wasn't a good idea and this video guide went too far but it's still amazing and funny.

Although Windows 95 was actually a great leap for desktop OSes, this kind of 'educational sitcom' tried to attract (then) youngsters with popular stars - but failed in several ways. A good attempt that doesn't really teach Windows and, as far as I can recall, wasn't so appealing to the intended audience.

By the way, check the VGA-sized monitor used to show Windows 95 features .
